

Standard List of Sigla for Targum Manuscripts

Eveline van Staalduine-Sulman

revised March 2014

Introduction

We provide you with a list of sigla for all Targum manuscripts. The sigla consist of two items, a letter referring to the *textual* family the manuscript belongs to and an individual number for each manuscript. The system of numbering is explained in Chapter 2 under the link 'Introduction to the Critical Edition'. The system of letters is explained in Chapters 3 and 4.

Generally, the following list only gives the numbers, because we only investigated some manuscripts stemmatologically. The manuscripts we did investigate have also the right letter. In some cases there are two letters, because the manuscript belongs to two different traditions, e.g. the Mixed Western tradition in the Former Prophets and the Sephardic tradition in the Latter Prophets.

Letters used:

b = Babylonian

y = Yemenite

i = Mixed Western: Italian, Ashkenazic and/or Sephardic

a = Ashkenazic

s = Sephardic

sc = Sephardic Christianized

r = Solger and the Rabbinic Bibles

f = Most Cairo Genizah fragments, now preserved in the Cambridge University Library, are not yet integrated in the list. The fragments containing Targum Samuel stand at the end of the list. They are classified with the letter f, because most fragments are too small to place them into one tradition.

Of several manuscripts it is unknown where they are preserved now. We got hold of their existence and contents through the catalogues. We still numbered them in case they show up again.
